

DIGITAL PRODUCT CASE STUDY

Astral Foresight

Cross-platform consultation, AI-assisted reports and real-time engagement for a Jyotish practice.

Astral Foresight is a Jyotish consultation business built to help Pandit ji manage clients, consultations, reports, and follow-ups through a modern digital platform. The business needed a cross-platform application that could support both client engagement and practice management.

Project classification: This project showcases a cross-platform consultation and client-engagement product for a Jyotish practice.

INDUSTRY	CLIENT TYPE	EVIDENCE
Consumer Services & Spiritual Technology	Jyotish consultation business	Projected
DELIVERY SCOPE		
Mobile product, AI reports, chat, calling and subscriptions		

Centralised client and consultation management	Faster preparation of repeatable report formats	More consistent appointment and follow-up workflows
Client profiles, consultation history, appointments and communication are managed in one product workflow.	AI-assisted templates reduce repeated preparation across consultation summaries and guidance formats.	Booking, notifications and follow-up tools support a more consistent client journey.

01 / BUSINESS CONTEXT

Who needed the solution

Astral Foresight is a Jyotish consultation business built to help Pandit ji manage clients, consultations, reports, and follow-ups through a modern digital platform. The business needed a cross-platform application that could support both client engagement and practice management. Clients needed an easier way to book appointments, ask questions, receive Jyotish guidance, and connect with Pandit ji in real time. At the same time, the Jyotish consultation team needed a centralized system to manage client records, generate reports, handle communication, and support users across multiple countries.

02 / CHALLENGE

What needed to change

The main challenge was that the Jyotish consultation business did not have a structured digital system to manage growing client demand and consultation workflows.

Consultations were managed across calls and messaging apps	Clients mostly connected through calls, WhatsApp, and informal messaging channels.
Client records and histories were scattered	Client records were scattered and difficult to maintain in one place.
Report preparation required repeated manual effort	Kundali analysis and Jyotish report preparation required significant manual effort.
Appointment coordination and follow-up were unstructured	Appointment scheduling was unstructured and depended on manual coordination.
International client engagement was difficult to manage consistently	International client onboarding was difficult to manage consistently.

03 / WORKFLOW TRANSFORMATION

Before and after

Previous workflow

- Consultations were managed across calls and messaging apps
- Client records and histories were scattered
- Report preparation required repeated manual effort
- Appointment coordination and follow-up were unstructured
- International client engagement was difficult to manage consistently

Structured workflow

- Centralise onboarding and profiles
- Generate AI-assisted reports
- Enable booking and communication
- Operate recurring engagement
- Review structured outputs

04 / SOLUTION

How we approached it

We designed Astral Foresight as an AI-enabled Jyotish and client engagement platform with cross-platform access for users and a structured management layer for the consultation business. The solution combined client onboarding, AI-based Jyotish report generation, appointment booking, in-app communication, secure calling, subscription workflows, and chatbot-based support.

01

Centralise onboarding and profiles

Create one client record for consultations, details, history and follow-up.

02

Generate AI-assisted reports

Support repeatable Jyotish report formats and personalised guidance preparation.

03

Enable booking and communication

Bring appointment requests, chat and secure calling into the product.

04

Operate recurring engagement

Support subscriptions, notifications and continuous client interaction.

05 / EXAMPLE WORKFLOW

From input to reviewable output

06 / DELIVERY SCOPE

What the delivery covered

Business and product workflow

- Cross-Platform Client Engagement Layer
- Multi-Nation Client Onboarding
- AI-Based Jyotish Report Generation

AI, data and automation

- Structured AI workflow
- Data processing and validation

Application and cloud engineering

- React
- React Native
- Node.js
- AWS

Scope boundary

AI-assisted content supports practitioner preparation and review; it does not provide scientific, medical or guaranteed predictive validation.

07 / ARCHITECTURE AND CONTROLS

How the system is organised

React

React Native

Node.js

AWS

Amazon SES

Professional-review boundary

AI-assisted reports support the practitioner and do not replace professional consultation or guarantee outcomes.

Authenticated client access

Client profiles, appointments and communication are managed through authenticated product workflows.

Communication controls

In-app chat, calling and notifications keep consultation activity within a structured client journey.

Expected operational value

1	Centralised client and consultation management Client profiles, consultation history, appointments and communication are managed in one product workflow.	Projected
2	Faster preparation of repeatable report formats AI-assisted templates reduce repeated preparation across consultation summaries and guidance formats.	Projected
3	More consistent appointment and follow-up workflows Booking, notifications and follow-up tools support a more consistent client journey.	Projected
4	In-app communication across the client journey Chat and calling features keep communication connected to the client record.	Projected
5	A scalable foundation for international and recurring engagement The cross-platform architecture supports recurring services, subscriptions and future expansion.	Projected

Technology and component roles

RE

React

Reviewer or product user interface

RE

React Native

Cross-platform mobile application

NO

Node.js

Backend and integration services

AW

AWS

Cloud infrastructure and managed services

AM

Amazon SES

Transactional email and alert delivery
